Weather Key Points

Regional Operations Center

Western Region

Saturday, August 6

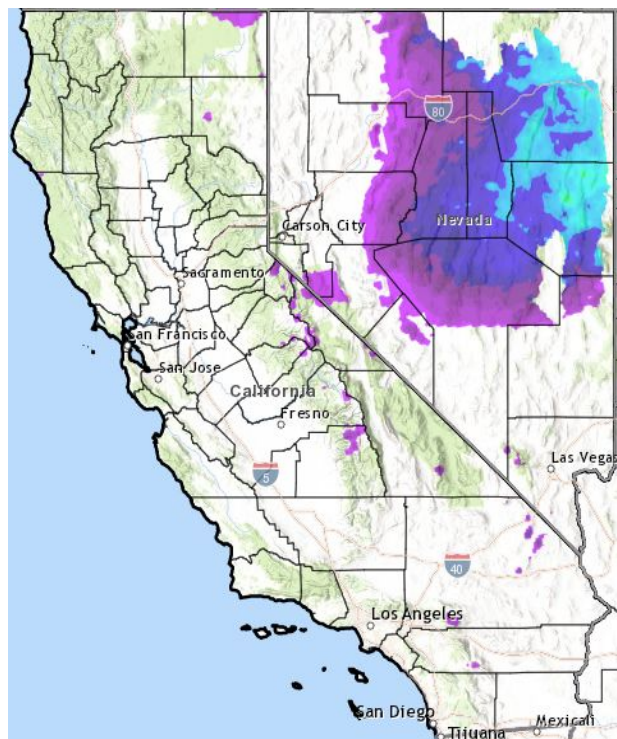

- Drier conditions expected through the weekend across the state, with a return of monsoonal moisture for Southeast California and the Sierra Nevada Sunday and into next week.
 - Some storms may produce locally heavy rain across the southern and central desert and mountains.
- Temperatures will be near normal to slightly cooler than normal for early August across the state for much of the coming week.

Precipitation Forecast

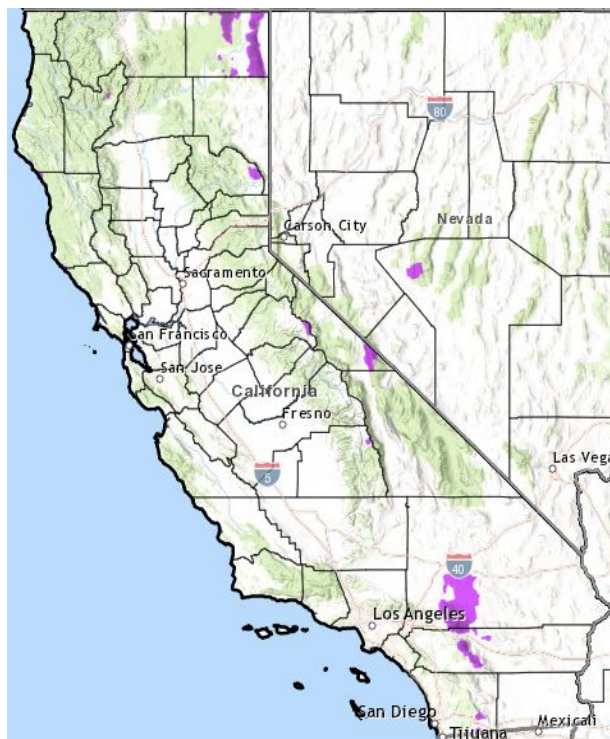

Regional Operations Center

Western Region

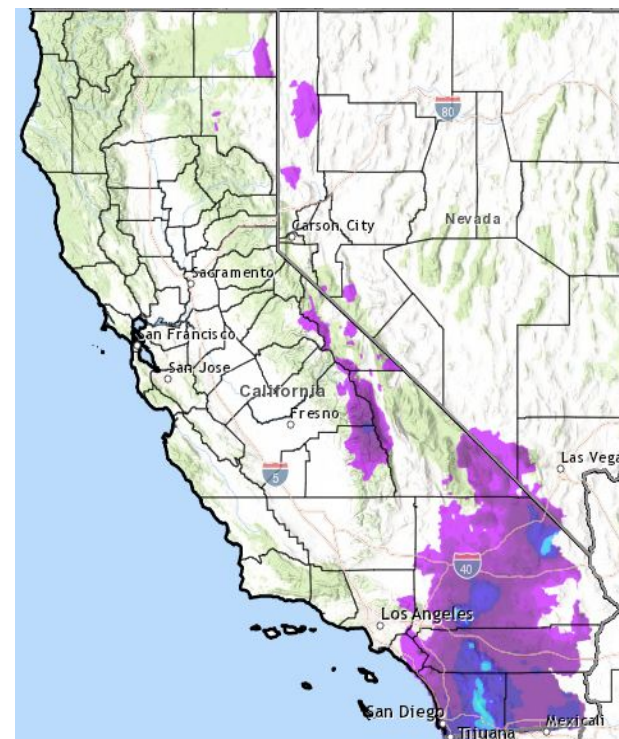

Saturday, August 6

Saturday

Sunday

Monday

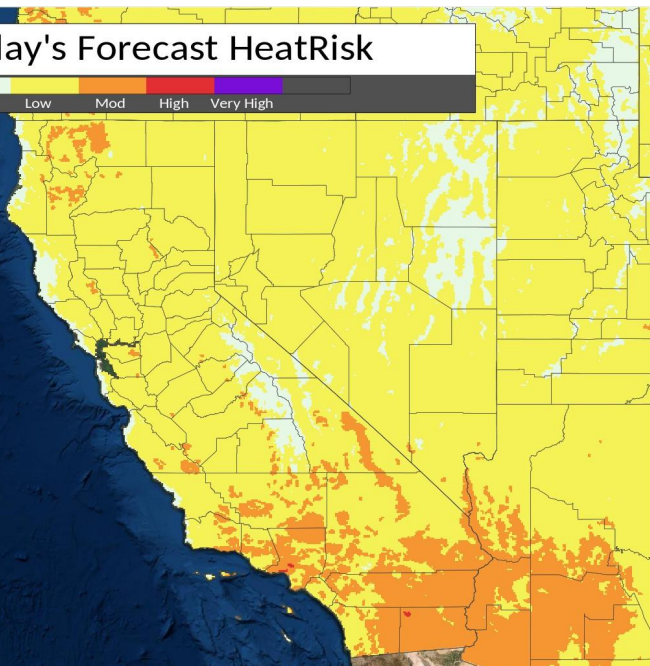

Important Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms will produce locally much higher rainfall amounts.

Precipitation (inches)

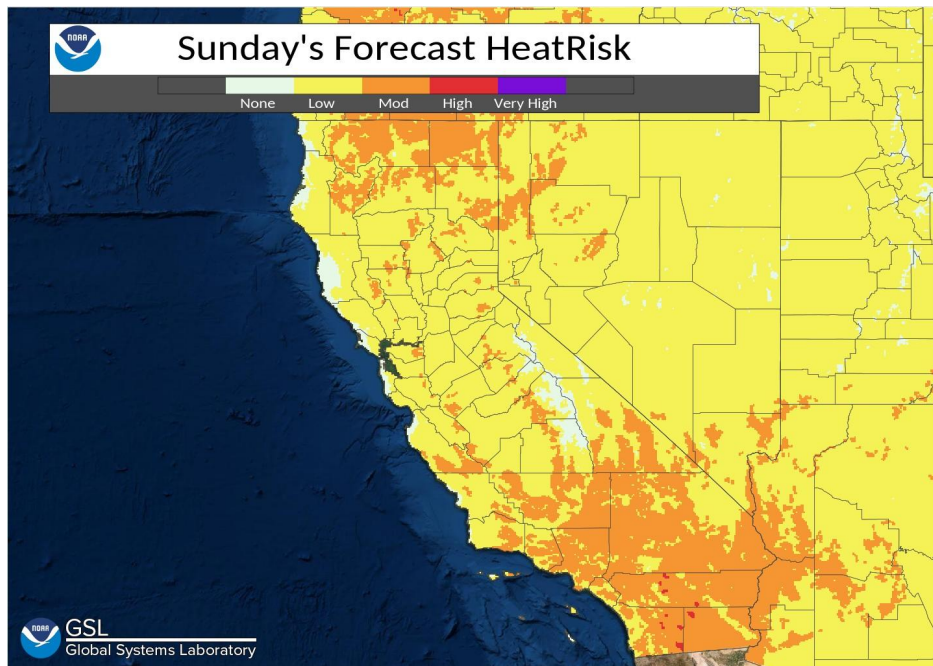

Saturday's Forecast HeatRisk

None Low Mod High Very High

Sunday's Forecast HeatRisk

None Low Mod High Very High

Green	Level 0	No Elevated Risk
Yellow	Level 1	Low Risk for those extremely sensitive to heat, especially those without effective cooling and/or adequate hydration
Orange	Level 2	Moderate Risk for those who are sensitive to heat, especially those without effective cooling and/or adequate hydration

Red	Level 3	High Risk for much of the population, especially those who are heat sensitive and those without effective cooling and/or adequate hydration
Magenta	Level 4	Very High Risk for the entire population due to long duration heat, with little to no relief overnight

Weather Outlook (6-14 Days)

Regional Operations Center

Western Region

Saturday, August 6

6-10 Day Outlook (August 11 – August 15)

Temperatures

- Near to below normal temperatures are favored across southeastern California, with above normal temperatures favored for the remainder of the state

Precipitation

- Above normal precipitation is favored over the interior and southern regions of the state as the monsoon weather pattern remains active

8-14 Day Outlook (August 13 – August 19)

Temperatures

- Near to below normal temperatures are favored across southeastern California, with above normal temperatures favored for the remainder of the state

Precipitation

- Above normal precipitation is slightly favored over the central and southern interior areas, and across southern regions of the state as the monsoon weather pattern remains active

Risk Assessment Matrix

Regional Operations Center

Western Region

Saturday, August 6

Impact Level Definition

- 1. Impactful weather is not expected.**
- 2. Potential threat to lives and property if no/incorrect actions are taken.**
 - Localized impacts on commerce possible.
 - Includes events that occur frequently.
- 3. Potential threat to lives and property if no/incorrect actions are taken.**
 - Impacts on commerce possible.
 - Includes events that occur a few times per year.
- 4. Actions likely needed to save lives and/or property.**
 - Significant impacts to commerce possible.
 - Includes events that occur infrequently.
- 5. Actions required to save lives and/or property.**
 - Significant and extended impacts to commerce.
 - Includes exceptionally rare events.
